## **POP-TUNES - VERSION 1.5**

---

Pop-Tunes Version 1.5 offers three new features:

- Support of additional wave forms
- Bank file for instrument sounds
- Reduced memory requirements.

The wave form is a parameter used to create an instrument sound. Pop-Tunes V1.5 supports the extra wave forms and can play songs which use instruments that contain these wave forms.

Previously, the parameters which define a particular instrument sound were stored in small, individual instrument (.INS) files. These instrument files have now been bundled together to form one large bank file. Details on how this effects Pop-Tunes are found in the README.TXT file.

The Pop-Tunes program now uses slightly less memory when running. As well, you can save space by reducing the size of the sound buffer. Again, you will find full details in the README.TXT file.
