## INFORMATION:

### Problem:

Using a 410CDT with Enhance Port Replicator (PA2711U), the XJ10BT and XJ2288 do get configured using the point enablers.

The XJ2288 (modem) does not get recognized by Setmhz.exe (Point enabler). The XJ10BT's point enabler (Setether.exe) does not support the PCMCIA sockets in the enhance port replicator (Sockets 2 and 3)..

### Solution:

Download XJ4288.EXE, the new point enabler, from the Megahertz's BBS. Self extract the file and launch install.

Install is another self extracting file. The two files that you will need to use are enable.exe and enable.ini.

Type in enable /?, to get the parameters you will need to get the network and the modem cards to work. I have listed my configuration files below (AUTOEXEC.BAT, CONFIG.SYS NET.CFG )

### AUTOEXEC.BAT

```
@ECHO OFF
PROMPT $p$g
PATH C:\DOS;C:\WINDOWS;C:\MOUSE
REM PCM+ path added.
PATH PCPLUS3;%PATH%
SET LMOUSE=C:\MOUSE
SET TEMP=C:\DOS
IF EXIST TOSCD001 LH C:\DOS\MSCDEX /L:D /D:TOSCD001 /M:10 C:\DOS\SMARTDRV.EXE 2048
128
REM C:\NOTE623\TSMICRO BUFFER:STD PORT:COM1 DEL:PERIOD C:\MOUSE\MOUSE
REM WIN
REM ===== Megahertz ODI Ethernet Drivers =====
C:\MHZENABLE /SD /I5 /B300 /PD400
    ^Memory exclusion for the Ethernet card
C:\MHZENABLE /SA /I3 /PD000
    ^Memory exclusion for the Modem
C:\MHZ\LSL.COM
```

: Media type can be any of the following: :  
; MEDIA\_TYPE 10BASET  
; MEDIA\_TYPE AUI

;MEDIA\_TYPE 10BASET  
^Had to disable this line in order to get my network card to work.
