

Games Master Keyboard

Operational Manual

Non TOP GUN PACKAGE User

Changes to (**In Bold**)

Chapter 1

Following is included in the package

2. Six Matts

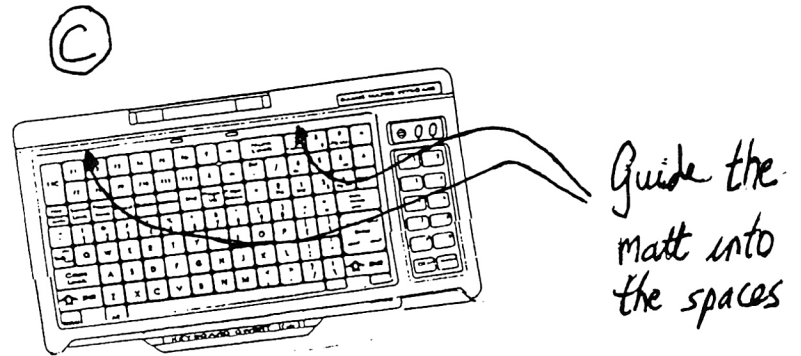

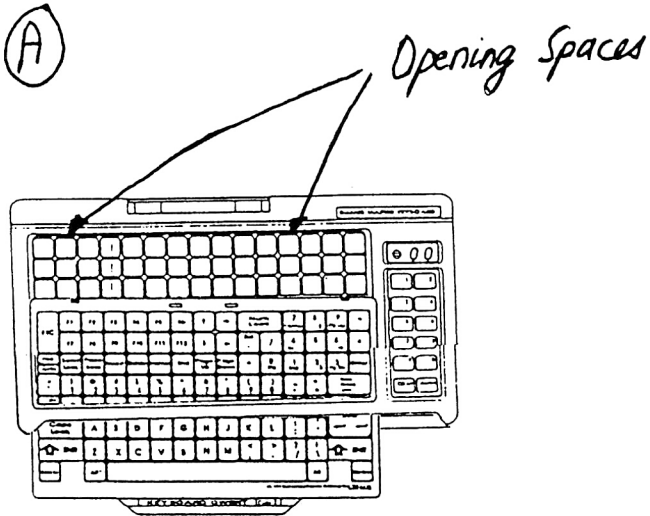

It would be the matts chosen by you and not as in the manual

Chapter 2

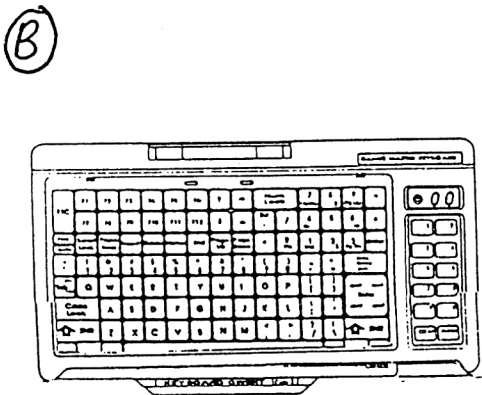

Testing Games Master Keyboard

No need to test if no QWERT Matt. Just get to the game and set the code. If the keyboard responds as it should then Games Master Keyboard is working fine.

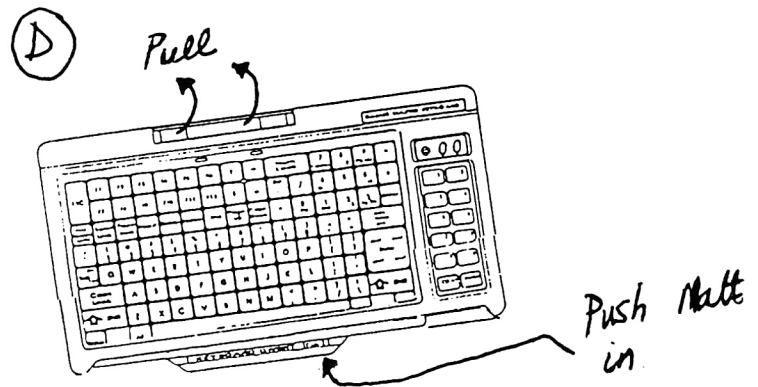

Installing the Matt

2. Use your fingers to put the top edges of the Matt into the spaces of the opening..

1. Slide the Matt into Games Master until the top edges meet the opening spaces.

3. Pull the locking mechanism backwards as hard as possible and at the same time push the Matt in. Don't worry the mechanism will not break. Also the mechanism might come off but this is normal.

4. Push the locking mechanism back to its original position. The Matt should be securely in place now.

5. To remove the Matt pull the locking mechanism backwards as hard as possible and at the same time pull the Matt out.
